

AR Flag

No more broken flag sticks.

No more ripped and torn flags.

Steel dowel with push pin.

STOP THE FOD

OTW Safety and Salt Lake City International Airport have designed this flag with the goal of reducing costs associated with flags and safety issues caused by FOD from broken flags. The AR Flag dowel is manufactured from heavy gauge tube steel. An integrated spring pin button holds the flag in place to withstand jetblasts. The AR Flag also has interchangeable fabric to reduce the long term cost of using flags on your airfield.

Specifications:

- Meets FAA A/C 150/5370-2E.
- Approved for purchase with AIP funds.
- Comes in brightly colored safety orange for high visibility.
- Steel Dowel.
- Interchangeable Flag.
- Push Pin to secure flag.

STOP Replacing the entire flag!! With OTW Safety's new flag there is no need to replace the entire flag when just the fabric becomes ripped and torn.

AR Flag:

Height: 32"
Flag: 20"x20"
Color: Orange
Dowel: Steel

Use OTW Safety's 100% FOD Free Barricade System

- AR10x96 Barricade interconnects with integrated FOD Fee Pin.
- CO1 Light threads into barricade.
- AR Flag pin and steel dowel will not break free from barricade.
- No nuts bolts or fasteners to become FOD.
