

## RAR10x96

The RAR 10x96 v.1 is The Original Low Profile Airport Barricade. The RAR 10x96 is a portable plastic water-ballast barricade designed to delineate runways and airfield construction zones. The barricade weighs 28 pounds when empty and 340 pounds when filled with water. Low-profile barricade replaces railroad-tie fabrications, drums, and flasher-barricades. FOD-free, jet-blast tested. Light, signage, and stanchion compatible. Stackable and easy to ship and store. Made from recyclable polyethylene plastic and available in safety orange, safety yellow, white, and custom colors. U-connector allows barricades to be physically bolted together to form a tamper-proof inseparable wall.

### Optional accessories:

- Warning flag can be used in pre-molded hole.
- Stanchions can be utilized with snow fencing or barricade rail to create Type III barricades.
- 6" x 6' reflective striping.
- U-Connector creates vandal-proof interlocking longitudinal walls.
- Compatible with other Multi-Barrier™ models to create walls of varying height.
- Optional tamper-resistant screws hold advertising or warning signs in vandal-prone areas.
- Flashing solar or battery-powered lights.

### Specifications:

- Meets FAA A/C 150/5370-2E.
- Approved for purchase with AIP funds.
- Made of resiliently deformable, frangible material.
- The barricade shape is low enough not to interfere with aircraft.
- May be ordered with 7" x 72" orange and white reflective, high intensity striping (504 sq. inches) on one or both sides.
- Stanchions can be utilized to create a fence.

#### COLORS:

Safety orange or white

#### COMPOSITION:

High impact, UV resistant, high density polyethylene plastic

#### SIZE:

Height: 10" / 25.4 cm  
Length: 96" / 2.44 m  
Length: Interconnected  
Length: 96" / 2.44 m  
Width: 10" / 25.4 cm  
Wall: .20" / 5.08 mm

#### WEIGHT:

Empty: 28 lbs. / 12.7 kg  
Full: 270 lbs. / 105.2 kg  
Requires 25 gallons of water.
