

MB 42x96 JSS

Features:

Portable plastic barricades are ideal for perimeter delineation, crowd control, construction sites, and parking areas. Lighter and more easily deployed than concrete road barriers, this heavy duty unit is fabricated to ballistics testing requirements. Extremely durable, once positioned and filled with water, barricades are very difficult to move. Deployments include gate access, traffic control approaches, standoff zones, perimeter/boundary lines, and hazardous material spills. This heavy-duty unit is fabricated to ballistics testing requirements. Live fire tests have been conducted on .375" wall barriers by HP White Labs.

MB42x96 JSS stack and store easily.

Specifications:

- Can be set up to create an interconnected wall with no gaps.
- HD Model with wall thickness of .375" or greater meets ballistic testing requirements.

Optional Accessories:

- Stanchions can be utilized with snow fencing to increase height.
- Pre-molded attachment area for flashing lights.
- U-connector creates vandal-proof interlocking longitudinal walls.
- Compatible with other Multi-Barrier™ models.
- Compatible with Guardian JSS barricades.
