

AR24x96 Airport Barricade

Work Zone Delineation

If you need to maintain a substantial yet low-profile boundary around a work site, the AR24x96 is for you. Slightly larger than the AR10x96, this barricade is ideal for settings where more vertical height and substance are required. Extremely easy to set up, these barricades are only 37 lbs. empty but at 785 lbs. filled with water, they are a durable, no-maintenance-required answer to work zone delineation. Our modular design allows the barricades to be connected quickly and easily to form a tamper-proof, inseparable wall that can withstand jet blast. They are extremely durable.

- **AIP ELIGIBLE.** Approved for purchase with AIP funds.
- **MEETS FAA REQUIREMENTS.** FAA Advisory Circular 150/5370-2E approved.
- **QUICK, EASY POSITIONING.** Can be repositioned using a forklift.

Specifications:

- System is modular to assemble, disassemble and nest for storage.
- Alternate orange and white barricades for more visual contrast.
- Allows for 6" x 72" reflective sheeting on both sides.
- Designed to prevent access to hazardous work areas and/or runways by forming a continuous wall.
- Can be made into a higher fence, using poles and other fencing material of your choice.

Benefits:

- Barricades are compatible with lights, fencing and, reflective sheeting.
- Easy set-up saves time and labor costs.
- Highly stable, easy to move when empty.
- Stackable designs for easy storage.
- Superior safety and minimal maintenance.

COLORS:

Safety orange or white

COMPOSITION:

High impact, UV resistant, high density polyethylene plastic

SIZE:

Height: 24" / 60.9 cm

Length: 96" / 2.44 m

Interconnected

Length: 84" / 2.13 m

Width: 14" / 6" (base / top)
35.5 cm / 15.2 cm

Wall: .20" / 5.08 mm

WEIGHT:

Empty: 41 lbs. / 18.6 kg

Full: 771 lbs. / 349.7 kg

Patent #D569,992
