

Multi-Barrier® Corner Connector

Barrier wall can be set up in any configuration.

MB350 with Kit.

FEATURES:

This barrier unit is designed for use with the Multi-Barrier® MB350 as a connecting barrier unit to allow for either left or right angle turns, or both simultaneously, of between 75° to 105° while locking together all connecting barriers.

In addition, the Corner Connector allows for a maximum of four connection points.

The Corner Connector locks to the MB350 through use of a patented pin-and-hole connection.

Lightweight and easy to handle, the Corner Connector Barrier is designed to correspond with the MB350 steel rods protruding through molded channels in the top section of the barrier.
