

Drums vs. LCBs Comparison

Side-by-side comparison of Off the Wall's MB42x45 LCB and orange drums.

MB42x45 LCB

VS.

Drums (as a wall)

COLORS:

Safety orange, white or yellow

COMPOSITION:

High impact, UV-resistant, high density polyethylene plastic

SIZE:

42" high x 45" long x 24" deep

Weight empty: 45 lbs, with required 8 gallon ballast: 110 lbs

FEATURES:

1. Forms a continuous wall with no gaps. Modular design allows LCBs to interlock easily together.
2. Mounting bracket for solar lights.
3. Easy to stack in cubes and store.
4. Display panel can be used for interchangeable signage or reflective panels.
5. Easy to set up and move as job site changes.

COLORS:

Safety orange and white

COMPOSITION:

Base: 25 lb. rubber base. Low-density, UV-resistant, polyethylene plastic

SIZE:

42" high x 24" wide

FEATURES:

1. Four 4" bands of reflective material.
2. Mounting bracket for solar lights.
3. Easy to store.

These drums are 30% more expensive than our LCBs!

For forming a continuous wall where protection is not the goal, Longitudinal Channelizing Barricades are the smartest, most economical choice. Drums are ideal for spanning long, straight distances. For a wall setup, an LCB is cheaper and better.

Multi-Barrier

MB42x45 LCBs form an interconnected wall!

OFFICIAL MUTCD SPECIFICATIONS:

- Meets MUTCD specification 6F.66 for Longitudinal Channelizing Barricades.
- Meets NCHRP-350 requirements for Longitudinal Channelizing Barricades at TL3.

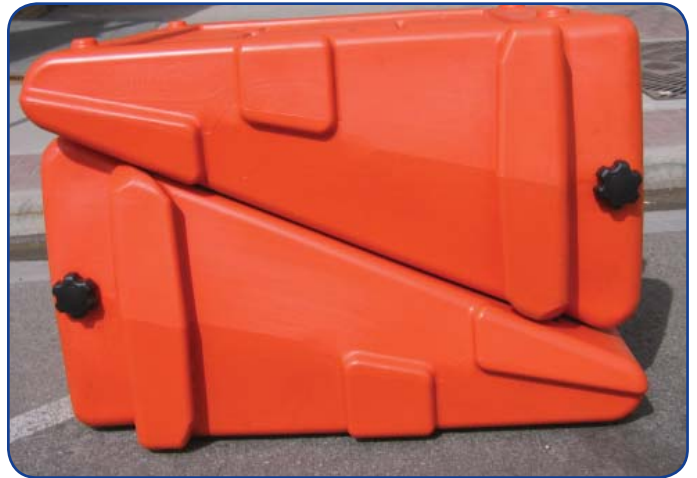

Signs like "No Parking" or "Employee Entrance" or just about anything can be displayed and won't knock over in bad weather.

OFFICIAL FEDERAL SPECIFICATIONS:

- Accepted by FHWA as a Longitudinal Channelizing Barricade for speeds of up to 62.5 mph (TL3).

Interlocking components are specially designed to allow the barricades to store in neat cubes.
